

### **A.I.M. to Make a Difference**

Goodmans Interior Structures' **A.I.M. to Make a Difference** furniture repurposing program matches a local 501(c) 3 nonprofit organization with used office furniture that would otherwise be tossed into a landfill. As part of our mission, we leverage our resources to support ongoing community services and to be a corporate role model for environmental stewardship. We invite you to join us in this mission.

### **Office Furniture Repurposing Helps the Environment**

Today, tons of reusable surplus furniture enters our local landfills – it's legal and it's easy. Our program provides reuse alternatives for surplus office furniture, diverting them to groups in need and sparing our environment. Our Asset & Inventory Management (A.I.M.) program provides a streamline process for all parties involved – the facilities donating and the organizations receiving.

**Recycle office furniture  
& eliminate landfill waste**

### **How it Works**

Current Goodmans clients interested in disposing of unwanted office furniture give authorization to donate products to the *A.I.M to Make a Difference* program.

Nonprofits needing office furniture contact Goodmans A.I.M. Facility directly with their wish list. We will then check the donated inventory for products that would fit the wish list.

Once a match has been made, detailed product lists are provided to the donating company and the nonprofit organization. Nonprofit's are required to provide proof of 501(c)3 status and a list of office and facility furniture needs. Products can be delivered and installed for a nominal fee.

To learn more about our A.I.M. to Make a Difference program contact Goodmans' A.I.M Facility.
